SmartWire Technology lessens the effects of micro-fractures and shading

Mono-crystalline PERC Busbar-less cells

Anodized aluminum frame (Space Black or Metallic Silver)

SMART FEATURES

Superior Energy Production

Module efficiency up to **19.0%** achieved by utilizing the most advanced technology in the solar industry.

SmartWire Technology (SWT)

The revolutionary process for connecting solar cells that outrivals busbars by spreading the electric current through 18 micro-wires.

Advanced PERC Technology

An advanced mono-crystalline cell which improves energy production by adding a special layer to capture more sunlight.

Exceptional at low-light Conditions

The round shape of SmartWire reduces the wire shading by 25% and introduces a light trapping effect.

Remarkable Connection Durability

SWT acts as a protective layer for the solar cell, ensuring reliable contact points for decades of consistent performance.

Industry Leading Warranty

Accomplished with superior materials proven to perform better against potential induced degradation (PID).
